- Aditya Kondekar
- Aditya Pundlik
- Omkar Patole

---

## **2. Abstract**

The proposed platform is a web-based community hub designed for farmers. It aims to connect farmers with peers, agricultural experts, and modern resources. The system provides real-time advice via an AI chatbot, enables discussion forums, and hosts a learning hub with tutorials and best practices. The project will foster collaboration, knowledge-sharing, and promote sustainable farming practices within the community.

## 4. Introduction

### 4.1 Purpose

The platform is designed to connect farmers with experts, peers, and agricultural resources. Its objective is to provide real-time assistance, foster collaboration, and promote sustainable agricultural practices. The system addresses the challenges faced by farmers such as lack of timely information and limited access to expert advice.

### 4.2 Scope

- **System Features:**
  - Community forum for discussions
  - AI chatbot for instant agricultural advice
  - Learning hub with tutorials and guides
  - User profiles for personalization
- **Stakeholders:** Farmers, agricultural experts, students, and faculty.
- **Community Benefits:** Improved access to knowledge, faster decision-making, and promotion of sustainable practices.

### 4.3 Definitions, Acronyms, and Abbreviations

- **AI** – Artificial Intelligence
- **CEP** – Community Engagement Project
- **OTP** – One-Time Password
- **API** – Application Programming Interface

#### **4.4 References**

- Agricultural Technology Adoption Research Papers
  - Government agricultural scheme websites
  - Google Gemini API documentation
  - IEEE 830 SRS standard
-

## 5. Overall Description

### 5.1 Product Perspective

A standalone web application accessible on mobile and desktop, integrating chatbot API, database, and discussion forum.

*(Block Diagram to be added)*

### 5.2 Product Functions

- Farmer registration via mobile number
- Forum for posting and replying to questions
- AI chatbot for instant farming advice
- Uploading and viewing tutorials
- Search function for posts and guides

### 5.3 User Classes and Characteristics

- **Farmers:** Basic digital literacy, need simple navigation
- **Experts/Moderators:** Provide solutions, monitor content
- **Administrators:** Manage platform and users

### 5.4 Operating Environment

- Frontend: HTML, CSS, JavaScript
- Backend: Django
- Database: SQL/MongoDB
- AI: Google Gemini API
- Browsers: Chrome, Firefox, mobile browsers

## **5.5 Design and Implementation Constraints**

- Must work with low-bandwidth internet
- User-friendly for rural communities
- Limited budget – preference for open-source tools

## **5.6 Assumptions and Dependencies**

- Farmers own smartphones
  - Internet connectivity in target regions
  - Government APIs remain available
-

## 6. Specific Requirements

### 6.1 Functional Requirements

- **FR1:** User registration
- **FR2:** Forum – post and reply to questions
- **FR3:** AI chatbot for instant agricultural support
- **FR4:** Upload and access tutorials (guides, videos)
- **FR5:** Search function for posts and guides

### 6.2 Non-Functional Requirements

- **Performance:** Page loads within 3 seconds on 3G; chatbot responds within 5 seconds
  - **Security:** OTP login, encrypted data
  - **Usability:** Simple UI, accessible in rural contexts
  - **Reliability:** 99% uptime, regular backups
  - **Scalability:** Support for increasing users
-

## **7. External Interface Requirements**

### **7.1 User Interfaces**

- Mobile and desktop responsive UI
- Simple navigation: Forum, Chatbot, Learning Hub

### **7.2 Hardware Interfaces**

- Android/iOS smartphones
- Laptops/Desktops

### **7.3 Software Interfaces**

- Django backend
- Google Gemini API
- SQL/MongoDB

### **7.4 Communication Interfaces**

- HTTPS for secure communication
  - REST API for chatbot integration
-

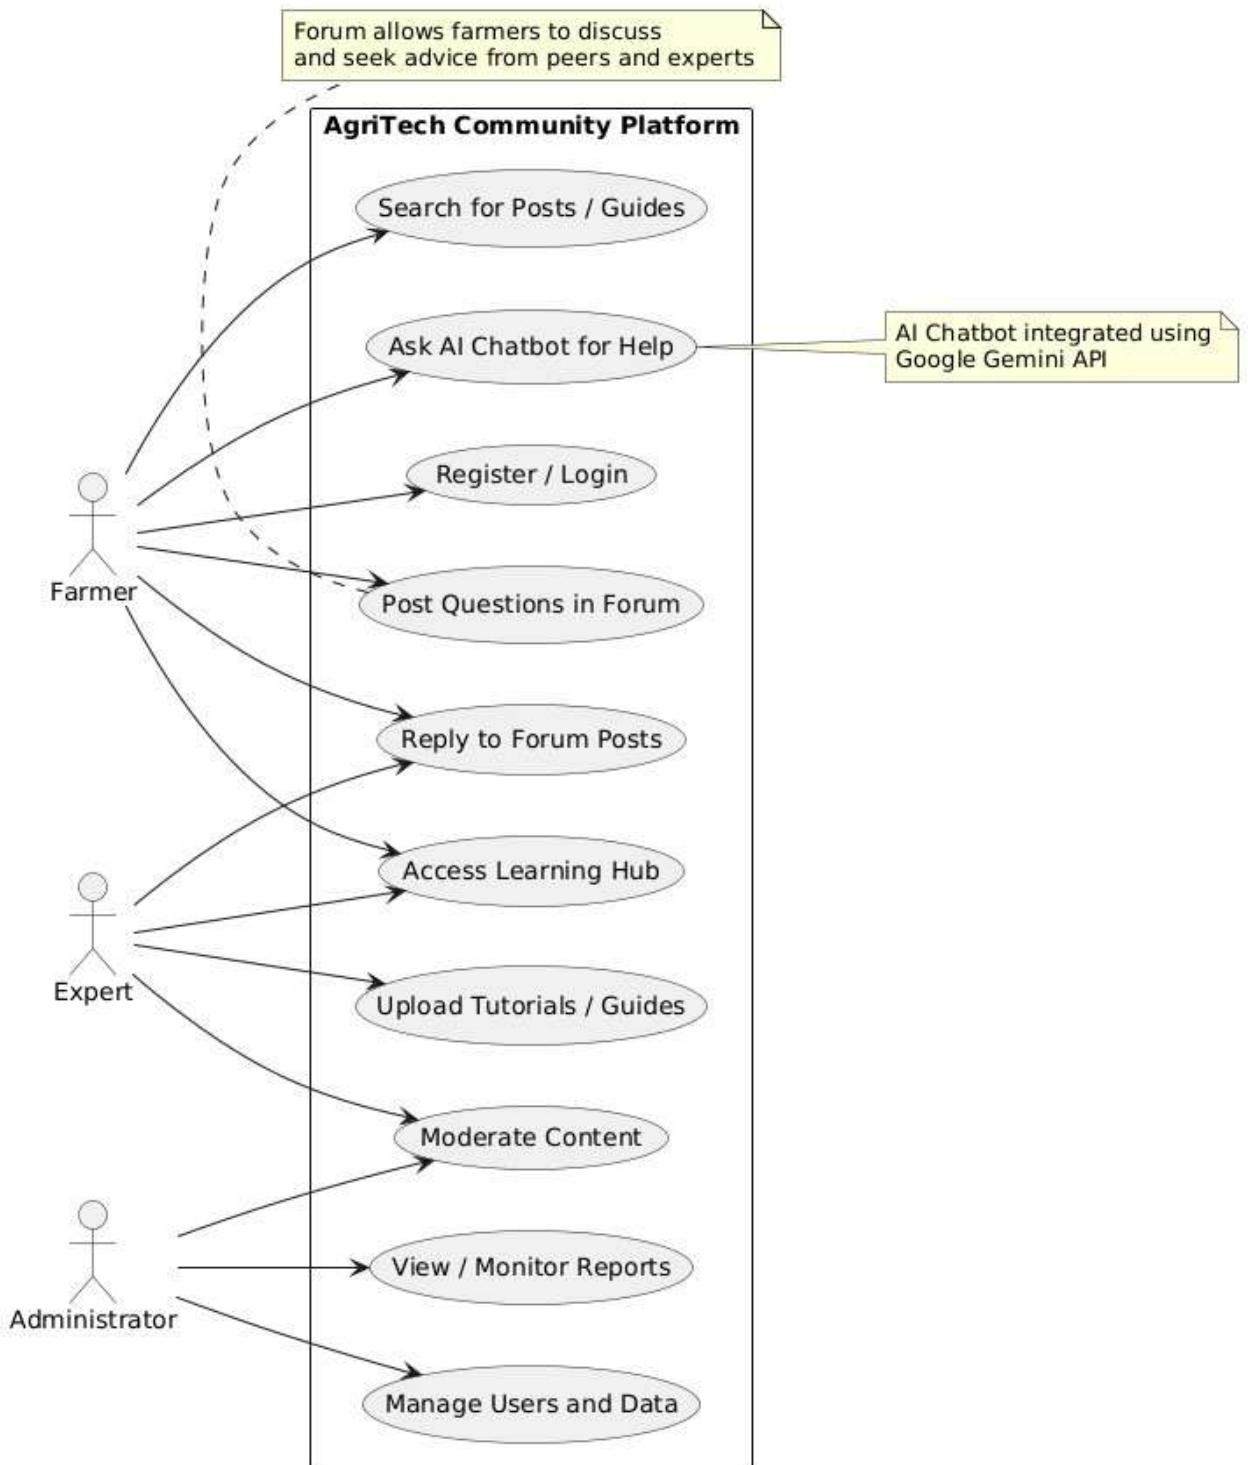

## 8. Use Case Diagram & Description

(To be drawn – showing actors: Farmer, Expert, Admin interacting with Forum, Chatbot, Learning Hub, etc.) **Use Cases:**

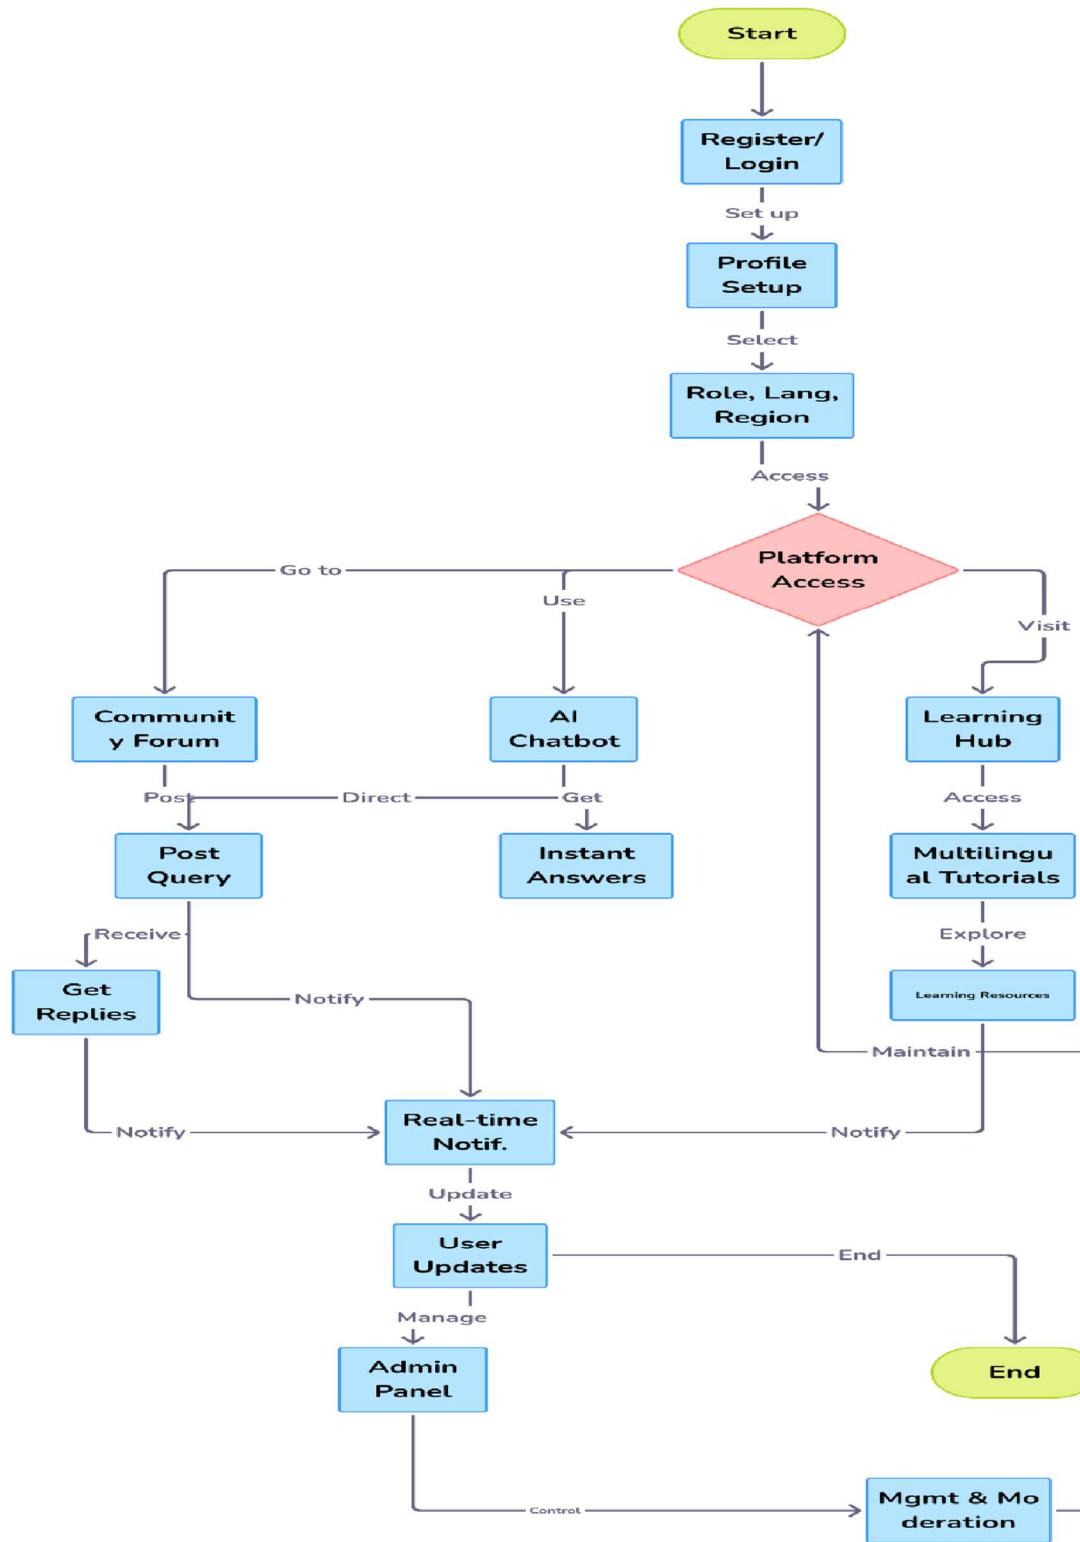

- Register/Login
- Post/Reply in Forum
- Ask AI Chatbot
- Upload Tutorials
- Search content
